Memory Test Report

Conducted by: Commerce Department

Date: 27th May 2024

Time: 11:30 am

Venue: LH.05

Introduction

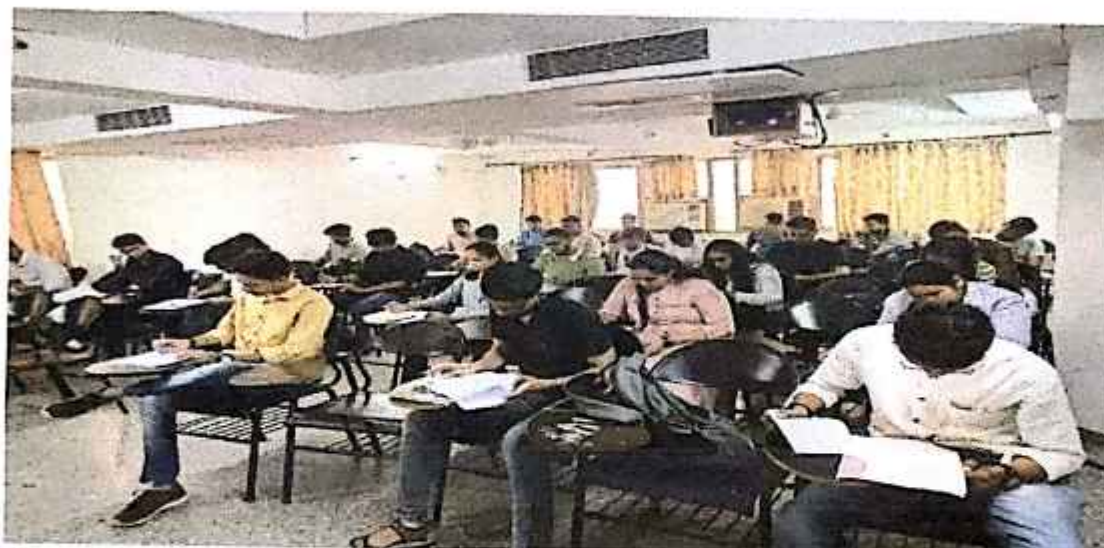

A memory test was conducted by the Commerce Department to assess the students' ability to recall and identify different parts of a model on Cottage Industry. The model was dismantled, and students were asked to find and identify the various components.

Methodology

1. The model on Cottage Industry was dismantled into its various parts.
2. Students were shown the dismantled model for a short period (5 minutes).
3. The students were then asked to find and identify the different parts of the model.
4. The time taken by each student to identify the parts was recorded.

Results

1. Time Taken: The average time taken by students to identify the parts was 10 minutes.

Conclusion

The memory test revealed that students have a good ability to recall and identify different parts of a model on Cottage Industry. However, there is still room for improvement, especially in terms of time management. The test results will be used to identify areas where students need additional support and to develop strategies to improve their memory and recall skills.
